

Endo-i[®]

Small Animal Wireless Endoscopes

Featuring:

CA1008 (1.0m) | **EQ1510** (1.5m)

Veterinary Endoscopes

Putting Innovation back into
Endoscopy for Small Animals

Endo-innovative portable design

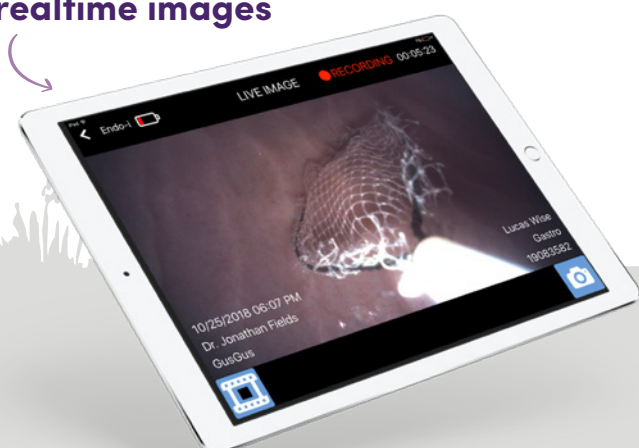

Our fully portable, HD quality endoscope and tablet is now available to buy for your veterinary surgery.

Based on the same great technology as the STERIS Endo-i® Equine and Large Animal Endoscope but with the option of a shorter 1m insertion tube and narrower biopsy channel or 1.5m insertion tube making the range suitable for dogs, cats and smaller mammals.

Traditionally vets may of used a traditional endoscope stack system or used other diagnostic methods to help in the identification of a condition but with our range of peripherals the Small Animal Endo-i® is more than just an endoscope and can be used to take biopsy's and remove foreign items using graspers.

Endo-instant realtime images

Product Specifications: 1m (CA1008)

Distal Head Outer Diameter	8.0mm
Insertion Tube Outer	8.0mm
Biopsy Channel	1.8mm
Angulation	210° up 90° down 100° left 100° right
Insertion Tube	1m
Resolution	Up to: 1080p
Warranty	One Year

Product Specifications: 1.5m (EQ1510)

Distal Head Outer Diameter	10.4mm
Insertion Tube Outer	9.8mm
Biopsy Channel	2.8mm
Angulation	180° up 90° down 90° left 90° right
Insertion Tube	1.5m
Resolution	Up to: 1080p
Warranty	One Year

What's in the case?

- Tablet computer
- Channel cleaning brushes
- Cleaning adapters
- Manual leak test device
- 4 Rechargeable batteries and charger
- 5 Air/water vault inlet covers
- 60ml syringe
- Control body cleaning brush
- User manual and reprocessing manual
- Hard shell case
- ENDOVET-VAC
- ENDOVET-SHEILD
- In-car charging adaptor
- 5 Biopsy port inlet covers

Our Wifi Endoscope app quickly connects to your Endo-i® device

Easy to use

Our Endo-i® app was designed with an intuitive user interface to be easy to navigate and use. Everything you need to manage your procedure is just a click away.

Manage Patient Information

The Endo-i® app acts as a hub for all of your flexible endoscopy procedures. You can easily manage patient data and procedures in one convenient place.

Export Procedural Data

Images and photos from your procedures are automatically exported to the tablet's photo library.

Endo-is much more affordable

The Immobile Endoscope Stack System Scenario

The Endo-i® is versatile and can be moved easily from room to room or even utilised in ambulatory situations. How many times this month have you struggled to book the theatre or clinic with the endoscope tower stack system in it? Maybe you have had problems with your tower stacks reliability or sourcing outdated parts leaving you concerned about how to effectively diagnose a condition (and significantly more out of pocket in the process.)

Second hand human scopes or substandard veterinary devices can be unreliable and the total cost of ownership including stacking systems and repairs can be considerable. Our Endo-i® is a significantly more cost effective solution with all the technology and functions you as a vet need to keep your pet patients in a safe pair of hands in a compact format which can be used from room to room or farmyard to client garden, all of this combined with a one year warranty.

Benefits

- Complete system with no requirement for additional peripherals
- WiFi transmission for longer range and reliable optic to tablet image so no lagging

About STERIS Animal Health

We are a team of animal lovers and owners providing medical grade surgical instruments, consumables and devices to the veterinary market.

We have a presence in Europe and in North America where our business has been established for 20 years.

STERIS Animal Health benefits from its own research and development biomedical engineering facility based in Birmingham, Alabama and Fort Lauderdale in Florida. It's here that the Endo-i® range of endoscopes are designed, developed and manufactured.
